

Add a Logo to the Title Slide

There is a text box on the master title slide in which you may put your business logo. It will then appear on all title slides used in your program. To change this logo or delete the placeholder logo, access the Slide Master.

Click on the **View** button in the toolbar and select **Show Master Slides**.

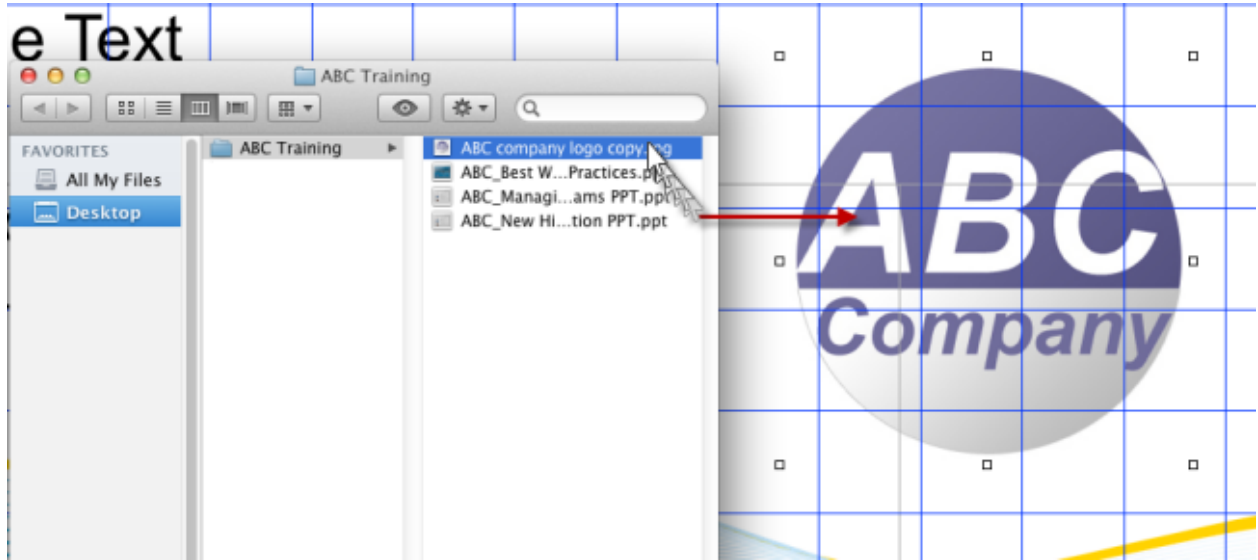

Click on the master title slide.

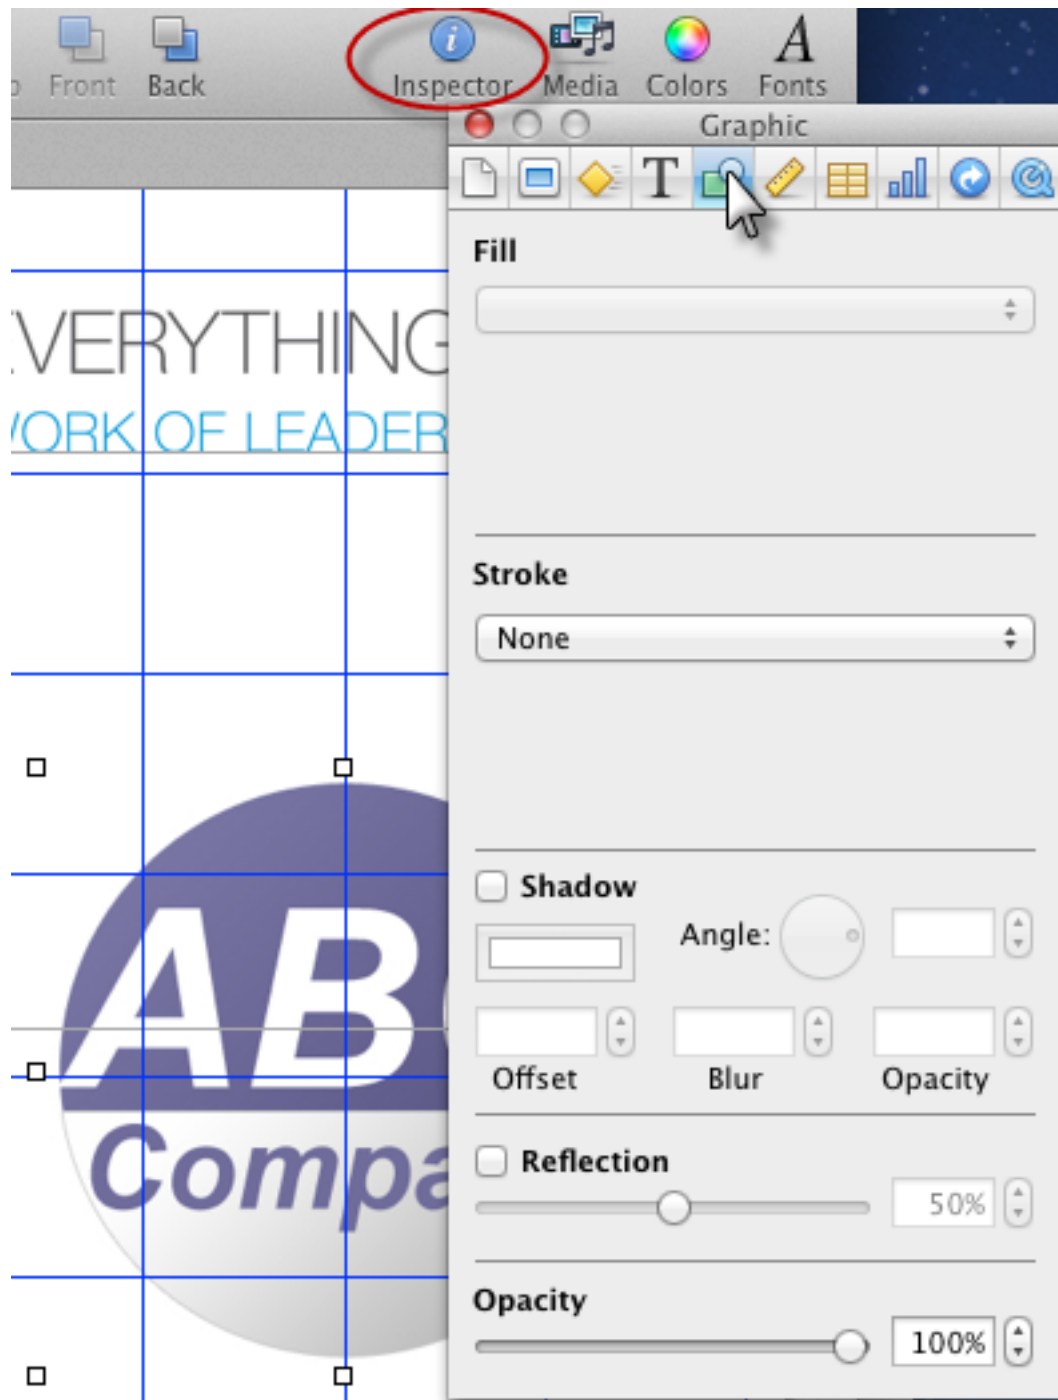

Click on the placeholder logo and delete it.

Using your computer's browser, locate the image file that contains your logo. Click on the file to highlight it, then drag it directly to the slide in the position you wish.

Use the tools in the Graphic Inspector on toolbar to edit the image.

See Add Business Information to the Title Slide for instructions on how to include your business information.

When you are finished, click on the **View** button in the toolbar and select **Hide Master Slides** to close the master.
